Volunteering at Normal Park

Hamilton County magnet schools require parent volunteer hours, yet at Normal Park volunteering has moved beyond a requirement to a commonly held expectation for magnet families and those who live within the school zone. Our families put in thousands of volunteer hours per year, and they are a primary reason for the successful transformation of Normal Park from a failing school to a national model of excellence.

Community volunteers also help out in many ways, from renovating our school buildings to tutoring students in math and language arts. We are thankful to our many friends in the community who partner with us each school year!
